Geographia Classica:

THE GEOGRAPHY OF THE ANCIENTS

So far describ'd as it is contain'd in the

Greek and *Latin Classicks*,

IN

Twenty-nine MAPS of the Old WORLD

and its several Kingdoms and Provinces: Wherein the chief Places mention'd in *Homer*, *Virgil*, *Ovid*, *Lucan*, *Eutropius*, *Cornelius Nepos*, *Justin*, *Quintus Curtius*, *Sallust*, *Livy*, *Cæsar*, *Plutarch*, *Xenophon*, *Herodotus*, and many other Ancient Authors are describ'd. To which is added, a MAP of the Places mention'd in the Old and New TESTAMENTS.

A COLLECTION long wanted, and now Publish'd for the Use of SCHOOLS.

The Second Edition.

LONDON,

Printed for C. BROWNE and Sold by BENJ. TOOKE and T. WARD, at the *Temple*; H. CLEMENTS and W. INNYS, in St. *Paul's* Church-yard; T. VARNAM and J. OSBORN in *Lombard-street*. MDCCXVII.

'80... 1914

THE PREFACE.

AS the right understanding the HISTORIANS who wrote in the *Greek* and *Latin* Tongues, on account of the Simplicity of their Style, hath been by long Experience found equally necessary for attaining a perfect Knowledge in those Languages, as the Reading their Poets and Orators; and consequently, JUSTIN, NEPOS, SALLUST, CÆSAR and LIVY, have been in our Schools taught with as much Success as TERENCE, VIRGIL, HORACE or CICERO: So great Care on this account has been taken, to render the former, as well as the later, intelligible to the several Ages and Capacities of those into whose Hands they have been put, by Explications, Interpretations, Paraphrases, and other Notes, which in a great measure have had their desired Effect.

Notwithſtanding this Care, in one reſpect the Endeavours of the Editors of our School-Books to explain their Authors, have fall'n ſhort; for tho' they have in their Notes ſo far given an Account of the Names of Hills, Rivers and Cities as to tell in what Kingdoms or Provinces they are, yet for want of Draughts to diſcribe theſe Kingdoms, and their Diviſions into Provinces neither the Diſtances, nor the reſpective Situation of the ſeveral Places mentioned, can in any manner be apprehended by the Scholar; for want of which Diſtinction, great Confuſion muſt neceſſarily ariſe in the Mind.

Thus, if a Maſter was to deſcribe to his Scholar, from his VIRGIL, the Navigation of ÆNEAS and tell him, that in his Voyage from *Troy* to *Italy* he paſſed through the *Cyclades*, and by the *Strophades* to the Golf of *Tarentum*; from whence to avoid the dangerous Paſſage between *Scylla* and *Charybdis*, he ſailed towards the *African* Coaſt thence ſailling by *Sicily*, he arrived on the Coaſt of *Italy*, and landed near the Mouth of *Tybris*.

Such a Deſcription as this cannot be made intelligible to the Scholar, by adding any Explanation in Words, who will not at all the better underſtand ÆNEAS's Courſe, deſcribed by his Author, by being told, that the *Cyclades* are Iſlands in the *Icarian*, the *Strophades* in the *Ionian*, and that *Scylla* is a Rock, and *Charybdis* a Whirlpool in the *Sicilian* Sea; becauſe he has no more any Notion of thoſe Seas, their Diſtances, or their reſpectiv

reſpective Situations, either to *Troy*, or to each other, than he had of theſe Places ſaid to lie in them; ſince theſe things can only be made intelligible to him by an actual Deſcription of theſe Seas and Iſlands in a Map, which will ſenſibly repreſent to him what no Words could ever effect without it.

For this Reaſon, to all the valuable Editions of ſuch of the School-Books as have wanted them, Maps have been added, as abſolutely neceſſary to make the Author's Meaning fully comprehended: But then theſe Editions have been neceſſarily held at ſo great a Price, as not to be eaſily compaſſed for Youth at Schools, for whoſe uſe, as it was needful to Print Editions of a cheaper ſort, ſo conſequently in them theſe Helps muſt be omitted.

To ſupply this Omiſſion, it has been thought an uſeful Service to Schools, to prepare a ſmall Collection of Maps of the Ancient World, and of ſuch Parts of it cheifly as are mentioned in the Claſſicks; and therein to deſcribe the chief Cities, Towns, Rivers, and Mountains, in as perfect a manner as ſo ſmall a Form would admit of; wherein the Scholar will be able, by Inſpection, to ſee their reſpective Situations; and by being told that each Degree in the Scale on the Sides of the Maps contain about Sixty Miles, to judge in a tolerable meaſure of their Diſtances, by applying their Diſtances in the MAPS to the Scale on the Sides.

This

This will make the Reading their Autho
tedious and more profitable to them, ſince
will not only with more Diſtinction appr
the Matters their Authors treat of, but wit
ſonable Exactneſs judge of the Actions deſc
by them, when by means of theſe Deſcri
they have a tolerable Notion of the Cou
through which their Armies are ſaid to m
the Rivers which they paſs, and the T
where they arrive, or which they ſubdue.

The Uſe and Advantage of ſuch Maps
ſo apparent, and the Perſons who are de
to reap this Advantage being ſuch as, gen
ſpeaking, are not in a Condition to purchaſe
any great rate, Care hath been taken, not
that they ſhould be carefully and handſo
Engrav'd, but alſo be had at a very mod
Charge, that ſo the general Uſe of them
not be hinder'd by the Greatneſs of the Price

One thing more it is thought neceſſary to
tion, That theſe Maps being Engrav'd by
reigner, ſome of the Places retain the *French*
minations, many of which have been re
though it was too late to mend them all
theſe are ſo near the *Latin* or *Engliſh* Nam
moſt Inſtances, that it is hoped it will oc
but little Difficulty to the Scholar, and g
great Offence to the Maſter.
